American BioHealth Group Announces Award From The World's Best Technology Showcase

SAN DIEGO, California, February, 2005- American BioHealth Group, LLC (ABG) a clinical stage pharmaceutical company located in San Diego, California, was selected from a hundreds of innovative technologies to highlight its patented technology, named The Hearing Pill™, at the World's Best Technology Showcase (WBT05) in March 2005. The WBT05 is a national competition and showcases broad-spectrum technologies developed at world-class research facilities and leading universities. Seventy-five exhibitors have been chosen by a seasoned screening panel of investors and commercialization experts on the basis of having the greatest potential for high growth commercial success.

ABG is developing a portfolio of pharmaceutically based products targeting treatment and prevention of hearing disorders. The patented technologies have been exclusively licensed from the United States Navy and other organizations. In the coming days American BioHealth Group announced a medical breakthrough that helps protect against hearing loss. The results of an extensive double blinded, placebo controlled, 550 patient clinical trial confirmed that the active ingredient in The Hearing Pill™ is effective in helping to prevent hearing loss from noise exposure. The clinical trial found a statistically significant positive biological effect in reducing the incidence of permanent hearing loss. The results of this study add to the extensive body of positive evidence done in the laboratory. The product can be purchased directly from ABG at www.thehearingpill.com.

Commenting on the selection to present the technology at the conference, American BioHealth Group's president Mark Mugerditchian states, "When one considers that hundreds and perhaps thousands, of technologies have been evaluated for the WBT05, ABG is indeed honored to be chosen to participate in this important event. It's gratifying to know that after years of developmental effort, ABG is rapidly becoming the worlds' leader in developing pharmaceutically based solutions to aid the millions suffering from the debilitating effects of hearing disorders."

"ABG Wins Silver Award at World's Best Technology Showcase"
